Note: The documents linked here are all my own work as the sole writer for a new product.

Documentation for hybrid deployments of Genesys Predictive Routing

In a hybrid deployment model, some functionality is accessed through the Genesys Multicloud CX cloud (formerly Genesys PureEngage Cloud) and the remaining components are deployed in the customer environment).

This repository contains copies of the following documentation:

[Genesys Predictive Routing Deployment and Operations Guide](#)

Genesys Predictive Routing Staff Help (for internal users, downloadable from this repository)

[Genesys Predictive Routing Help \(for customers\)](#)

Genesys predictive routing articles in the Genesys Cloud CX Resource Center
